

# Interview Script: Copy Editor

## INTRODUCTION

- Introduction of ourselves
- Purpose of the Interview
  - During this session, we would like to get to know you and your work, especially your workflow around using CMS. Most of us are new to news content, so think of us like your new interns and try to describe every aspect of your work. We are interested to learn what is working well for you, and what isn't working well and what you would want, even more so.
  - There are no right or wrong answers, and please feel completely free to say that you don't know something. We're not here to judge but to learn from you how you perform tasks and how you feel.
  - We are going to be video and voice recording, as well as screen recording while you show us your workflow. All of them will be confidential and will be used only for research purposes among ourselves. But please let us know if you wish not to be recorded with any of these means at any point during the session.
